Background

Achin has more than thirty years of Application Delivery, Digital Transformation and System Integration experience across different geographies (India, America, Europe and AP) for both private and public sector clients. He has multi-cultural experience having worked overseas in Australia, USA, Singapore etc. In his last position at ULTS as Head of Delivery, he was responsible for leading large scale Digital Transformation projects from strategy to implementation in eGovernance and ERP systems. His key roles included Delivery Management, Account Management, Team Development and Technology Strategy. He is well versed in AI/ML & Gen AI technology.

Select Functional Experiences:

Project Portfolio Management

- Led the Legislative Assembly portfolio of 52Cr value at ULTS, building a set of applications to automate over 85% of core legislative business and another 60% of administrative functions, improving the speed of operation by 4 folds
- Established the Test Center Excellence of a large Indian Telco at Accenture, providing centralized testing services to modernization projects of all Lines of Business serving 140M+ subscribers.
- Set-up and managed remote delivery center for Ordering and Provisioning portfolios of a global Telco giant at IBM with $7.5M revenue annually. Built call routing program to compute least cost route for 1000's of concurrent calls in milli-secs.

Diverse Technology Management:

- Made the Assembly platform future-ready by utilizing modern technology (Angular, Java/ Spring Boot, Microservices, Kubernetes, PostgreSQL, React Native) deployed on private cloud (VMware) in on-premise Data Center.
- Modernized a State Assembly Secretariat with fast and highly secured network (thru' 3-layer H/W appliances) and 800+ desktops controlled by an on-premise Data Center.

Data Analytics & Decision Support:

- Applied delivery analytics widely in IBM to assess & assure health of 1000+ projects
- Utilized HR Analytics to drive hiring, salaries, skills for 500+ employees in ULTS
- Reduced project cost by over 30% by monitoring financial metrics in ULTS, IBM etc.

Delivery Excellence Leadership:

- Steered all Global Delivery Centers of IBM across 8 countries to CMMI L5 accreditation across over 1000 projects by leading 40 global QA Consultants
- Leveraged Gen-AI tools to improve S/W delivery productivity by 40% at ULTS

Technical Talent Development:

- Hired & trained a team of 100+ members in the Assembly domain and went live with House automation in a record time of less than three months
- Planned, built and managed the offerings, skills and capabilities of IBM India Testing Practice consisting of over 6000 professionals growing it by over 80% in 3 years, overseeing a business of well above USD 100M.

Client and Stakeholder Management:

- Expanded the Test Center scope of Indian Telco by engaging stakeholders from all LOBs, growing team strength by 85% above baseline and revenue by 66% above plan to a portfolio of $1.25M a year with over 20% profit
- Steered the HR automation and analytics at ULTS by transforming all manual processes to Odoo-based ERP system collaborating with all senior Leaders
